DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 2, 4 and 7-12 (in part), drawn to compounds of examples 1 and 2 and compositions and use thereof.

Group II, claim(s) 1, 2, 4 and 7-12 (in part), drawn to compounds of examples 3-5 and compositions and use thereof.

Group III, claim(s) 1-12, drawn to compounds not defined by Groups I and II and compositions and use thereof.

2. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The compounds of the claims contain a steroid moiety which does not define a contribution over the prior art. The substituents on the steroid moiety vary extensively and when taken as a whole result in vastly different compounds. Accordingly, unity of invention is lacking and restriction of the invention in accordance with the rules of unity of invention is proper.

3. Applicant is required, in reply to this action, to elect a single disclosed species (e.g. Example), from under the elected Group, for search purposes. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Art Unit: 1616

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
